Turkey Roll & Build Activity

Thank you for downloading this FREE resource at ChildCareEd! This activity can be printed out in either color or black/white. For this activity, teachers will need to gather the following materials:

- Copy of the “Turkey Roll & Build” Activity
- Dice
- Unifix Cubes

Directions:

1. Direct children to roll the dice and identify the number on the paper. The children will “build” towers using the number of Unifix cubes they rolled.

To extend this activity, teachers can also consider other materials such as Lego blocks, or use the second sheet to challenge children to use two dice instead of one.
